

## **Appendix C**

### **Photo Logs – Test Trenches, Soil Borings**

Photo 1 Test trench SOC4-TT1.

Photo 2 Test trench SOC4-TT9, debris encountered.

Photo 3 Spoil pile from test trench SOC4-TT9. Debris encountered included concrete, plastic, metal, glass, ash, shingles and tiles.

Photo 4 Test trench SOC4-TT9B, debris encountered.

Photo 5 35-gallon drum containing gypsum wallboard found in test trench SOC4-TT9B.

Photo 6 Test trench SOC4-TT12. Analytical soil sample SOC4-TT12-0.5' was collected from 0.5 feet below ground surface in this test trench.

Photo 7 Test trench SOC5-TT17.

Photo 8 Tar coating on DNT storage bunker 260-H (Bld. 604) and drainage tile removed from the perimeter of the building.

Photo 9 Tar coating and poorly graded gravel layer below the floor slab at DNT storage bunker 260-H (Bld. 604).

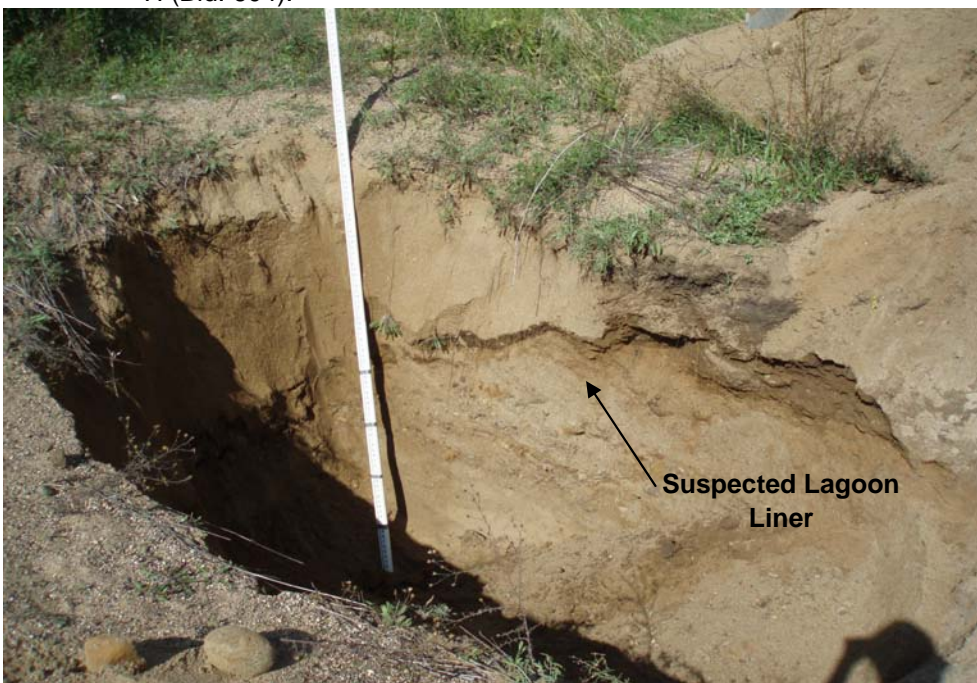

Photo 10 Test trench SOC5-TT29 in the former rinsate lagoon. Lagoon liner was observed in this test trench.

Photo 11 Work zone delineation at SOC5-GP6

Photo 12 Stained soils at SOC5-GP8

Photo 13 Temporary well installation at SOC4-GP1

Photo 14 Pesticide sampling borings at SOC5-GP13, locations A through D

Photo 15 Drilling on the DNT storage bunker berm at SOC5-GP21

Photo 16 Groundwater sampling at SOC5-GP3
