(Revised)

RE: UMore East - ABC Line 23/19-1092 48RI 510

Dear Jim Eidem:

Braun Intertec Corporation received samples for the project identified above on July 13, 2011. Analytical results are summarized in the following report.

All routine quality assurance procedures were followed, unless otherwise noted.

Analytical results are reported on an "as received" basis unless otherwise noted. Where possible, the samples will be retained by the laboratory for 14 days following issuance of the initial final report. The samples will be disposed of or returned at that time. Arrangements can be made for extended storage by contacting me at this time.

We appreciate your decision to use Braun Intertec Corporation for this project. We are committed to being your vendor of choice to meet your analytical chemistry needs.

If you have any questions please contact me at the above phone number.

Sincerely,

Steven J. Albrecht
Project Manager

Case Narrative:

MDH does not offer certification for the following parameters: carbazole in the 8270C analysis.

MPCA does not require certification for the following parameters: ethylene and propylene glycol and the 8330 analysis.

Recoveries for the 8270 matrix spike compounds fluorene, fluoranthene, and phenanthrene were slightly below laboratory limits in the batch B1F2407 MSD. The MS/MSD source sample was 501F1-TT3_3-3. All target analytes were within limits in the LCS/MS.

Recovery for the 8270 surrogate phenol-d6 was above limits in the sample 501F1-TT3_3-3.

Sample 772Y-TT3_0.5-0.5 for 8330 explosives was extracted one day past the recommended holding time. The laboratory was instructed by the client to continue with the analysis.

Recoveries for tetryl in the 8330 MS/MSD samples were below the laboratory control limits. The LCS sample was within limits. The MS/MSD source sample was not associated with this work order.

Project: 23191092
Project Number: 23191092.00 48RI 510
Project Manager: Ms. Andrea Nord

Work Order #: 1102773
Date Reported: 07/13/11

Notes and Definitions

S-GC Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate(s).
M2 Matrix spike recovery was low, the associated blank spike recovery was acceptable.
J Parameter was present between the MDL and RL and should be considered an estimated value
H4 Sample was extracted past required extraction holding time, but analyzed within analysis holding time.
< Less than value listed
dry Sample results reported on a dry weight basis
NA Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL Method Detection Limit
RL Reporting Limit
RPD Relative Percent Difference
LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS Matrix Spike = Laboratory Fortified Matrix (LFM)

Received on ice: Yes	Temperature blank was not present	Received on ice pack: No
Received on melt water: No	Ambient: No	Acceptable (IH/ISO only): No
Custody seals: No		

Case Narrative:

MDH does not offer certification for the following parameters: dichlorofluoromethane, tetrahydrofuran, and 1,1,2-trichlorotrifluoroethane in the 8260B analysis and carbazole in the 8270C analysis.

Recovery for the 8270 matrix spike compound fluorene was below laboratory limits in the batch B1F2802 MS. The MS/MSD source sample was EEA5-TT3_0.5-0.5. All target analytes were within limits in the LCS/MSD.

Recoveries for lead in the MS/MSD samples and the corresponding %RPD were above the laboratory control limits due to the analyte concentration being disproportionate to the spike level. The LCS/LCSD samples and the LCS/LCSD %RPD were within limits. The MS/MSD source sample was 46T-TT6_0.5-0.5.

Notes and Definitions

- QR-04 The RPD value for the MS/MSD was outside of QC acceptance limits. Data was accepted based on LCS and/or LCSD recovery and/or RPD values.
- M3 The spike recovery value is unusable since the analyte concentration in the sample is disproportionate to the spike level. The associated blank spike recovery was acceptable.
- M2 Matrix spike recovery was low, the associated blank spike recovery was acceptable.
- J Parameter was present between the MDL and RL and should be considered an estimated value
- < Less than value listed
- dry Sample results reported on a dry weight basis
- NA Not applicable. The %RPD is not calculated from values less than the reporting limit.
- MDL Method Detection Limit
- RL Reporting Limit
- RPD Relative Percent Difference
- LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
- MS Matrix Spike = Laboratory Fortified Matrix (LFM)

Barr Engineering Co.
4700 W 77th St
Minneapolis, MN 55435

Work Order Number: 1102840
RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 06/24/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

Shipping Container Information

Default Cooler Temperature (°C): 5.2

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: No

Case Narrative:

MDH does not offer certification for the following parameters: carbazole in the 8270C analysis.

MPCA does not require certification for the following parameters: flashpoint.

Recovery for the 8270 matrix spike compound phenanthrene was above laboratory limits in the batch B1F2912 MS. The MS/MSD source sample was 111B-TT1_5-5. All target analytes were within limits in the LCS/MSD.

Project: 23191092
Project Number: 23191092 48RI 510
Project Manager: Ms. Andrea Nord

Work Order #: 1102840
Date Reported: 07/13/11

Notes and Definitions

M1 Matrix spike recovery was high, the associated blank spike recovery was acceptable.
J Parameter was present between the MDL and RL and should be considered an estimated value
< Less than value listed
dry Sample results reported on a dry weight basis
NA Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL Method Detection Limit
RL Reporting Limit
RPD Relative Percent Difference
LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS Matrix Spike = Laboratory Fortified Matrix (LFM)

RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 06/24/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

Received on melt water: No	Ambient: No	Acceptable (IH/ISO only): No
Custody seals: No		

Case Narrative:

MDH does not offer certification for the following parameters: carbazole in the 8270C analysis.

MPCA does not require certification for the following parameters: flashpoint.

Recovery for the 8270 matrix spike compound fluorene was below laboratory limits in the batch B1F2802 MS. The MS/MSD source sample was not associated with this work order. All target analytes were within limits in the LCS/MSD.

Recovery for the 8270 surrogate phenol-d6 was above limits in the sample 113B-SS2_0.5-0.5.

Notes and Definitions

S-GC Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate(s).

M2 Matrix spike recovery was low, the associated blank spike recovery was acceptable.

J Parameter was present between the MDL and RL and should be considered an estimated value

< Less than value listed

dry Sample results reported on a dry weight basis

NA Not applicable. The %RPD is not calculated from values less than the reporting limit.

MDL Method Detection Limit

RL Reporting Limit

RPD Relative Percent Difference

LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)

MS Matrix Spike = Laboratory Fortified Matrix (LFM)

RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 06/24/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

Default Cooler Temperature (°C): 5.2

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: No

Case Narrative:

MDH does not offer certification for the following parameters: dichlorofluoromethane, tetrahydrofuran, and 1,1,2-trichlorotrifluoroethane in the 8260B analysis and carbazole in the 8270C analysis.

Recovery for the 8270 matrix spike compound phenanthrene was above laboratory limits in the batch B1F2912 MS. The MS/MSD source sample was not associated with this work order. All target analytes were within limits in the LCS/MSD.

Recovery for the 8270 matrix spike compound anthracene was below laboratory limits in the batch B1F3010 MSD. The MS/MSD source sample was 16T-TT1_0.5-0.5. All target analytes were within limits in the LCS/MS.

Methylene chloride was detected in the method blank between the MDL and RL for 8260 batch B1F3019. Samples with methylene chloride detections less than or equal to 10 times the blank contamination are qualified.

Project: 23191092
Project Number: 23191092 48RI 510
Project Manager: Ms. Andrea Nord

Work Order #: 1102846
Date Reported: 07/11/11

Notes and Definitions

M2 Matrix spike recovery was low, the associated blank spike recovery was acceptable.
M1 Matrix spike recovery was high, the associated blank spike recovery was acceptable.
J Parameter was present between the MDL and RL and should be considered an estimated value
B-02 Target analyte was present in the method blank between the MDL and RL.
B-01 Analyte was present in the method blank. Sample result is less than or equal to 10 times the blank concentration.
< Less than value listed
dry Sample results reported on a dry weight basis
NA Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL Method Detection Limit
RL Reporting Limit
RPD Relative Percent Difference
LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS Matrix Spike = Laboratory Fortified Matrix (LFM)

RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 06/24/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

Shipping Container Information

Default Cooler Temperature (°C): 5.2

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: Yes

Case Narrative:

MDH does not offer certification for the following parameters: carbazole in the 8270C analysis.

MPCA does not require certification for the following parameters: flashpoint and ethylene and propylene glycol.

Recovery for the 8270 matrix spike compound anthracene was below laboratory limits in the batch B1F3010 MSD. The MS/MSD source sample was not associated with this work order. All target analytes were within limits in the LCS/MS.

Recovery for mercury in the MS sample and the corresponding %RPD were above the laboratory control limits. The LCS/LCSD/MSD samples and the LCS/LCSD %RPD were within limits. The MS/MSD source sample was 302A-SS1_1-1

Notes and Definitions

- QR-04 The RPD value for the MS/MSD was outside of QC acceptance limits. Data was accepted based on LCS and/or LCSD recovery and/or RPD values.
- M2 Matrix spike recovery was low, the associated blank spike recovery was acceptable.
- M1 Matrix spike recovery was high, the associated blank spike recovery was acceptable.
- J Parameter was present between the MDL and RL and should be considered an estimated value
- < Less than value listed
- dry Sample results reported on a dry weight basis
- NA Not applicable. The %RPD is not calculated from values less than the reporting limit.
- MDL Method Detection Limit
- RL Reporting Limit
- RPD Relative Percent Difference
- LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
- MS Matrix Spike = Laboratory Fortified Matrix (LFM)

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: No

Case Narrative:

MDH does not offer certification for the following parameters: dichlorofluoromethane, tetrahydrofuran, and 1,1,2-trichlorotrifluoroethane in the 8260B analysis and carbazole in the 8270C analysis.

MPCA does not require certification for the following parameters: flashpoint.

Recovery for the 8270 matrix spike compound anthracene was below laboratory limits in the batch B1F3010 MSD. The MS/MSD source sample was not associated with this work order. All target analytes were within limits in the LCS/MS.

Recoveries for several 8270 matrix spike compounds were below laboratory limits in the batch B1G0607 MS/MSD due to sample matrix interference. The MS/MSD source sample was 707FFF-SS2_0.5-0.5. All target analytes were within limits in the LCS.

Methylene chloride was detected in the method blank between the MDL and RL for 8260 batch B1F3019. Samples with methylene chloride detections less than or equal to 10 times the blank contamination are qualified.

Notes and Definitions

- W-03 The initial sample weight was less than 8.0 grams.
- QM-05 The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data is acceptable.
- M2 Matrix spike recovery was low, the associated blank spike recovery was acceptable.
- J Parameter was present between the MDL and RL and should be considered an estimated value
- B-02 Target analyte was present in the method blank between the MDL and RL.
- B-01 Analyte was present in the method blank. Sample result is less than or equal to 10 times the blank concentration.
- < Less than value listed
- dry Sample results reported on a dry weight basis
- NA Not applicable. The %RPD is not calculated from values less than the reporting limit.
- MDL Method Detection Limit
- RL Reporting Limit
- RPD Relative Percent Difference
- LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
- MS Matrix Spike = Laboratory Fortified Matrix (LFM)

RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 06/27/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

Shipping Container Information

Default Cooler Temperature (°C): 3.7

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: No

Case Narrative:

MDH does not offer certification for the following parameters: dichlorofluoromethane, tetrahydrofuran, and 1,1,2-trichlorotrifluoroethane in the 8260B analysis and carbazole in the 8270C analysis.

Recoveries for several 8270 matrix spike compounds were below laboratory limits in the batch B1G0607 MS/MSD due to sample matrix interference. The MS/MSD source sample was not associated with this work order. All target analytes were within limits in the LCS.

Recoveries for 8270 matrix spike compounds fluorene in the batch B1G0630 MS/MSD and anthracene in the MSD were below laboratory limits. The MS/MSD source sample was 207-DD-TT1_1-1. All target analytes were within limits in the LCS.

Recovery for the 8270 surrogate 2-fluorobiphenyl was below laboratory limits in samples D4-TT3_0.5-0.5, D4-TT1_0.5-0.5, 207-DD-TT1_1-1 and the batch B1G0630 MSD.

Methylene chloride was detected in the method blank between the MDL and RL for 8260 batch B1F3019. Samples with methylene chloride detections less than or equal to 10 times the blank contamination are qualified.

Notes and Definitions

S-GC	Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate(s).
QM-05	The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data is acceptable.
M2	Matrix spike recovery was low, the associated blank spike recovery was acceptable.
J	Parameter was present between the MDL and RL and should be considered an estimated value
B-02	Target analyte was present in the method blank between the MDL and RL.
B-01	Analyte was present in the method blank. Sample result is less than or equal to 10 times the blank concentration.
<	Less than value listed
dry	Sample results reported on a dry weight basis
NA	Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL	Method Detection Limit
RL	Reporting Limit
RPD	Relative Percent Difference
LCS	Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS	Matrix Spike = Laboratory Fortified Matrix (LFM)

Work Order Number: 1102876
RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 06/27/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

Shipping Container Information

Default Cooler Temperature (°C): 3.7

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: No

Case Narrative:

MDH does not offer certification for the following parameters: carbazole in the 8270C analysis.

MPCA does not require certification for the following parameters: flashpoint.

Recoveries for 8270 matrix spike compounds fluorene in the batch B1G0630 MS/MSD and anthracene in the MSD were below laboratory limits. The MS/MSD source sample was not associated with this work order. All target analytes were within limits in the LCS.

Recovery for the 8270 surrogate 2-fluorobiphenyl was below laboratory limits in sample 22926-TT1_0.5-0.5 and the MSD. Recovery for the surrogate terphenyl-d14 was above laboratory limits in samples RR-D5-TT1_0.5-0.5 ,and D5-TT2_0.5-0.5.

REVISION

Ms. Andrea Nord
Barr Engineering Co.
4700 W 77th St
Minneapolis, MN 55435

Work Order Number: 1102879
RE: 23191092

This is a revised report. The details of the revision are listed in the case narrative on the following page.

Enclosed are the results of analyses for samples received by the laboratory on 06/28/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of the original report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

Shipping Container Information

Default Cooler

Temperature (°C):

Received on ice: Yes
 Received on melt water: No
 Custody seals: Yes

Temperature blank was present
 Ambient: No

Received on ice pack: No
 Acceptable (IH/ISO only): No

Case Narrative:

MDH does not offer certification for the following parameters: dichlorofluoromethane, tetrahydrofuran, and 1,1,2-trichlorotrifluoroethane in the 8260B analysis and carbazole in the 8270C analysis.

MPCA does not require certification for the following parameters: flashpoint.

Recoveries for 8270 matrix spike compounds fluorene in the batch B1G0630 MS/MSD and anthracene in the MSD were below laboratory limits. The MS/MSD source sample was not associated with this work order. All target analytes were within limits in the LCS.

Recovery for the 8270 surrogate 2-fluorobiphenyl was below laboratory limits in the MSD.

Methylene chloride was detected in the method blank between the MDL and RL for 8260 batch B1F3019. Samples with methylene chloride detections less than or equal to 10 times the blank contamination are qualified.

Recovery for lead in the MS sample for batch B1H1104 was outside of the laboratory control limits due to the analyte concentration being disproportionate to the spike level. The LCS/LCSD samples and the LCS/LCSD and MS/MSD %RPDs were within limits. The MS/MSD source sample was 10SD-TT3_0.5-0.5.

At the client's request, this report was revised on August 11, 2011 to include TCLP lead analysis for sample 10SD-TT3_0.5-0.5.

Notes and Definitions

S-GC Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate(s).

M3 The spike recovery value is unusable since the analyte concentration in the sample is disproportionate to the spike level. The associated blank spike recovery was acceptable.

M2 Matrix spike recovery was low, the associated blank spike recovery was acceptable.

J Parameter was present between the MDL and RL and should be considered an estimated value

B-02 Target analyte was present in the method blank between the MDL and RL.

B-01 Analyte was present in the method blank. Sample result is less than or equal to 10 times the blank concentration.

< Less than value listed

dry Sample results reported on a dry weight basis

NA Not applicable. The %RPD is not calculated from values less than the reporting limit.

MDL Method Detection Limit

RL Reporting Limit

RPD Relative Percent Difference

LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)

Work Order Number: 1102880
RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 06/28/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

Temperature (°C):

 Received on ice: Yes
 Received on melt water: No
 Custody seals: No

 Temperature blank was not present
 Ambient: No

 Received on ice pack: No
 Acceptable (IH/ISO only): No

Case Narrative:

MDH does not offer certification for the following parameters: carbazole in the 8270C analysis.

Recoveries for 8270 matrix spike compounds fluorene in the batch B1G0630 MS/MSD and anthracene in the MSD were below laboratory limits. The MS/MSD source sample was not associated with this work order. All target analytes were within limits in the LCS.

Recovery for the 8270 surrogate 2-fluorobiphenyl was below laboratory limits in the batch B1G0630 MSD.

Recoveries for several 8270 matrix spike compounds were below laboratory limits in the batch B1G0706 MS. All target analytes were within limits in the LCS/MSD. The MS/MSD %RPDs were outside laboratory limits for phenol and 4-chloro-3-methylphenol, however, both percent recoveries were within limits. The MS/MSD source sample was not associated with this work order.

Recoveries for the 8270 surrogates phenol-d6, 2-fluorobiphenyl, and 2,4,6-tribromophenol were below laboratory limits in the batch B1G0706 MS.

Notes and Definitions

S-GC Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate(s).
S-02 Surrogate recovery outside of laboratory acceptance limits.
R5 MS/MSD RPD exceeded the laboratory acceptance limit. Recoveries met acceptance criteria.
M2 Matrix spike recovery was low, the associated blank spike recovery was acceptable.
J Parameter was present between the MDL and RL and should be considered an estimated value
< Less than value listed
dry Sample results reported on a dry weight basis
NA Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL Method Detection Limit
RL Reporting Limit
RPD Relative Percent Difference
LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS Matrix Spike = Laboratory Fortified Matrix (LFM)

Case Narrative:

MDH does not offer certification for the following parameters: carbazole in the 8270C analysis.

MPCA does not require certification for the following parameters: flashpoint.

Recoveries for several 8270 matrix spike compounds were below laboratory limits in the batch B1G0706 MS. The MS/MSD source sample was 220C-SS3_1-1. All target analytes were within limits in the LCS/MSD. The MS/MSD %RPDs were outside laboratory limits for phenol and 4-chloro-3-methylphenol, however both percent recoveries were within limits.

Recoveries for the 8270 surrogates phenol-d6, 2-fluorobiphenyl and 2,4,6-tribromophenol were below laboratory limits in the batch B1G0706 MS.

Recoveries for barium in the MS sample and lead in the MS/MSD samples were above the laboratory control limits for the soil batch. The barium LCS/LCSD/MSD samples and the lead LCS/LCSD samples and the corresponding %RPDs were within limits. The MS/MSD source sample was 220C-SS4_1-1.

Notes and Definitions

S-02 Surrogate recovery outside of laboratory acceptance limits.
R5 MS/MSD RPD exceeded the laboratory acceptance limit. Recoveries met acceptance criteria.
M2 Matrix spike recovery was low, the associated blank spike recovery was acceptable.
M1 Matrix spike recovery was high, the associated blank spike recovery was acceptable.
J Parameter was present between the MDL and RL and should be considered an estimated value
< Less than value listed
dry Sample results reported on a dry weight basis
NA Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL Method Detection Limit
RL Reporting Limit
RPD Relative Percent Difference
LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS Matrix Spike = Laboratory Fortified Matrix (LFM)

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: Yes

Case Narrative:

MDH does not offer certification for the following parameters: carbazole in the 8270C analysis.

Barr Engineering Co. 4700 W 77th St Minneapolis, MN 55435	Project: 23191092 Project Number: 23191092-48RI 810 Project Manager: Ms. Andrea Nord	Work Order #: 1102919 Date Reported: 07/14/11

RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 06/29/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

Shipping Container Information

Default Cooler Temperature (°C): 4.7

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: Yes

Case Narrative:

MDH does not offer certification for the following parameters: carbazole in the 8270C analysis.

MPCA does not require certification for the following parameters: flashpoint.

ANALYTICAL REPORT FOR SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
228-SB1_12-12	1102923-01	Soil	06/28/11 08:10	06/29/11 10:30

Shipping Container Information

Default Cooler Temperature (°C): 3.5

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: Yes

Case Narrative:

MDH does not offer certification for the following parameters: carbazole in the 8270C analysis.

MPCA does not require certification for the following parameters: flashpoint.

Recovery for mercury in the MS sample and the corresponding %RPD were above the laboratory control limits. The LCS/LCSD/MSD samples and the LCS/LCSD %RPD were within limits. The MS/MSD source sample was not associated with this work order.

Notes and Definitions

- QR-04 The RPD value for the MS/MSD was outside of QC acceptance limits. Data was accepted based on LCS and/or LCSD recovery and/or RPD values.
- M1 Matrix spike recovery was high, the associated blank spike recovery was acceptable.
- J Parameter was present between the MDL and RL and should be considered an estimated value
- < Less than value listed
- dry Sample results reported on a dry weight basis
- NA Not applicable. The %RPD is not calculated from values less than the reporting limit.
- MDL Method Detection Limit
- RL Reporting Limit
- RPD Relative Percent Difference
- LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
- MS Matrix Spike = Laboratory Fortified Matrix (LFM)

Work Order Number: 1102924
RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 06/29/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

ANALYTICAL REPORT FOR SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
251A-TT1_0.5-0.5	1102924-01	Soil	06/28/11 10:00	06/29/11 10:30
251A-TT2_4-4	1102924-02	Soil	06/28/11 10:30	06/29/11 10:30
251A-TT3_0.5-0.5	1102924-03	Soil	06/28/11 11:00	06/29/11 10:30

Shipping Container Information

Default Cooler Temperature (°C): 4.0

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: No

Case Narrative:

MDH does not offer certification for the following parameters: carbazole in the 8270C analysis.

MPCA does not require certification for the following parameters: 8330 analysis.

Recoveries for tetryl in the 8330 MS/MSD samples were below the laboratory control limits. The LCS sample was within limits. The MS/MSD source sample was 251A-TT1_0.5-0.5.

Recovery for mercury in the MS sample and the corresponding %RPD were above the laboratory control limits. The LCS/LCSD/MSD samples and the LCS/LCSD %RPD were within limits. The MS/MSD source sample was not associated with this work order.

Notes and Definitions

- QR-04 The RPD value for the MS/MSD was outside of QC acceptance limits. Data was accepted based on LCS and/or LCSD recovery and/or RPD values.
- M2 Matrix spike recovery was low, the associated blank spike recovery was acceptable.
- M1 Matrix spike recovery was high, the associated blank spike recovery was acceptable.
- J Parameter was present between the MDL and RL and should be considered an estimated value
- < Less than value listed
- dry Sample results reported on a dry weight basis
- NA Not applicable. The %RPD is not calculated from values less than the reporting limit.
- MDL Method Detection Limit
- RL Reporting Limit
- RPD Relative Percent Difference
- LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
- MS Matrix Spike = Laboratory Fortified Matrix (LFM)

Shipping Container Information

Default Cooler Temperature (°C): 3.5

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: Yes

Case Narrative:

MDH does not offer certification for the following parameters: dichlorofluoromethane, tetrahydrofuran, and 1,1,2-trichlorotrifluoroethane in the 8260B analysis and carbazole in the 8270C analysis.

MPCA does not require certification for the following parameters: flashpoint.

Recoveries for 8270 matrix spike compounds anthracene in the batch B1G0503 MS and fluorene in the MS/MSD were below laboratory limits. The MS/MSD source sample was sample BG-SB1_6-6. All target analytes were within limits in the LCS.

Recovery for the 8270 surrogate 2-fluorobiphenyl in the batch B1G0503 MS/MSD and sample BG-SB3_2-2 was below laboratory limits

Methylene chloride was detected in the method blank between the MDL and RL for 8260 batch B1F3019. Samples with methylene chloride detections less than or equal to 10 times the blank contamination are qualified.

Notes and Definitions

S-GC	Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate(s).
M2	Matrix spike recovery was low, the associated blank spike recovery was acceptable.
J	Parameter was present between the MDL and RL and should be considered an estimated value
B-02	Target analyte was present in the method blank between the MDL and RL.
B-01	Analyte was present in the method blank. Sample result is less than or equal to 10 times the blank concentration.
<	Less than value listed
dry	Sample results reported on a dry weight basis
NA	Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL	Method Detection Limit
RL	Reporting Limit
RPD	Relative Percent Difference
LCS	Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS	Matrix Spike = Laboratory Fortified Matrix (LFM)

Minneapolis, MN 55435

Work Order Number: 1102928
RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 06/29/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

ANALYTICAL REPORT FOR SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
A7-SB1_0.5-0.5	1102928-01	Soil	06/28/11 09:10	06/29/11 10:30
A5-SB1_12-12	1102928-02	Soil	06/28/11 10:00	06/29/11 10:30

Shipping Container Information

Default Cooler Temperature (°C): 3.5

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: Yes

Case Narrative:

MDH does not offer certification for the following parameters: carbazole in the 8270C analysis.

MPCA does not require certification for the following parameters: flashpoint.

Work Order Number: 1102930
RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 06/29/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 06/24/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

Shipping Container Information

Default Cooler Temperature (°C): 5.2

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: No

Case Narrative:

MDH does not offer certification for the following parameters: carbazole in the 8270C analysis.

MPCA does not require certification for the following parameters: flashpoint, ethylene glycol, propylene glycol, and the 8330 analysis.

Recovery for the 8270 surrogate nitrobenzene-d5 was below laboratory limits in sample FB-2.

Recoveries for 8270 matrix spike compounds anthracene in the batch B1G0503 MS and fluorene in the MS/MSD were below laboratory limits. The MS/MSD source sample was not associated with this work order. All target analytes were within limits in the LCS.

Recovery for the 8270 surrogate 2-fluorobiphenyl in the batch B1G0503 MS/MSD was below laboratory limits.

Recoveries for tetryl in the 8330 MS/MSD samples were below the laboratory control limits. The LCS sample was within limits. The MS/MSD source sample was not associated with this work order.
