Notes and Definitions

T-1	MDH does not offer certification for this parameter.
S-02	Surrogate recovery outside of laboratory acceptance limits.
QR-04	The RPD value for the MS/MSD was outside of QC acceptance limits. Data was accepted based on LCS and/or LCSD recovery and/or RPD values.
QM-11	Spike recovery was outside of laboratory limits
QM-10	LCS/LCSD were analyzed in place of MS/MSD.
Q9	Insufficient sample received to meet method QC requirements.
M2	Matrix spike recovery was low, the associated blank spike recovery was acceptable.
L1a	The associated blank spike recovery was above laboratory acceptance limits.
J	Parameter was present between the MDL and RL and should be considered an estimated value
B-02	Target analyte was present in the method blank between the MDL and RL.
<	Less than value listed
dry	Sample results reported on a dry weight basis
NA	Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL	Method Detection Limit
RL	Reporting Limit
RPD	Relative Percent Difference
LCS	Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS	Matrix Spike = Laboratory Fortified Matrix (LFM)

Custody seals: Yes		

Case Narrative:

Recovery for 8270 matrix spike compound phenanthrene was above laboratory limits in the batch B1J2001 MSD. The MS/MSD source sample was not associated with this work order. All target analytes were within limits in the LCS/MS.

Di-n-butylphthalate was detected in the method blank between the MDL and RL for 8270 batch B1J2001. Samples with di-n-butylphthalate detections less than or equal to 10 times the blank contamination are qualified.

Recoveries of the 8082 surrogate decachlorobiphenyl, surrogate tetrachloro-meta-xylene, and Aroclor 1260 in the batch B1J2406 MSD and the corresponding %RPD were outside laboratory acceptance limits. Recoveries of the surrogates and spike were within limits in the LCS/MS. The source sample was not associated with this work order.

Recoveries for ethylbenzene in the batch B1J2441 MS/MSD was above 8260 laboratory limits but within limits in the LCS. The MS/MSD source sample was U-LWBC7-SB3_11-11

Acetone and tetrahydrofuran were detected in the 8260 batch B1J2441 BLK between the MDL and RL. Samples with acetone and tetrahydrofuran detections less than or equal to 10 times the blank contamination are qualified.

Notes and Definitions

T-1	MDH does not offer certification for this parameter.
S-02	Surrogate recovery outside of laboratory acceptance limits.
QR-04	The RPD value for the MS/MSD was outside of QC acceptance limits. Data was accepted based on LCS and/or LCSD recovery and/or RPD values.
M2	Matrix spike recovery was low, the associated blank spike recovery was acceptable.
M1	Matrix spike recovery was high, the associated blank spike recovery was acceptable.
J	Parameter was present between the MDL and RL and should be considered an estimated value
B-02	Target analyte was present in the method blank between the MDL and RL.
B-01	Analyte was present in the method blank. Sample result is less than or equal to 10 times the blank concentration.
<	Less than value listed
dry	Sample results reported on a dry weight basis
NA	Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL	Method Detection Limit
RL	Reporting Limit
RPD	Relative Percent Difference
LCS	Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS	Matrix Spike = Laboratory Fortified Matrix (LFM)

Case Narrative:

Recoveries of the 8082 surrogate decachlorobiphenyl, surrogate tetrachloro-meta-xylene, and Aroclor 1260 in the batch B1J2406 MSD and the corresponding %RPD were outside laboratory acceptance limits. Recoveries of the surrogates and spike were within limits in the LCS/MS. The source sample was not associated with this work order.

Recoveries for ethylbenzene in the batch B1J2441 MS/MSD was above 8260 laboratory limits but within limits in the LCS. The MS/MSD source sample was not associated with this work order

Acetone and tetrahydrofuran were detected in the 8260 batch B1J2441 BLK between the MDL and RL. Samples with acetone and tetrahydrofuran detections less than or equal to 10 times the blank contamination are qualified.

Notes and Definitions

T-1	MDH does not offer certification for this parameter.
S-02	Surrogate recovery outside of laboratory acceptance limits.
QR-04	The RPD value for the MS/MSD was outside of QC acceptance limits. Data was accepted based on LCS and/or LCSD recovery and/or RPD values.
M2	Matrix spike recovery was low, the associated blank spike recovery was acceptable.
M1	Matrix spike recovery was high, the associated blank spike recovery was acceptable.
J	Parameter was present between the MDL and RL and should be considered an estimated value
B-02	Target analyte was present in the method blank between the MDL and RL.
B-01	Analyte was present in the method blank. Sample result is less than or equal to 10 times the blank concentration.
<	Less than value listed
dry	Sample results reported on a dry weight basis
NA	Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL	Method Detection Limit
RL	Reporting Limit
RPD	Relative Percent Difference
LCS	Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS	Matrix Spike = Laboratory Fortified Matrix (LFM)

REVISION

Ms. Andrea Nord
Barr Engineering Co.
4700 W 77th St
Minneapolis, MN 55435

Work Order Number: 1105127
RE: 23191092

This is a revised report. The details of the revision are listed in the case narrative on the following page.

Enclosed are the results of analyses for samples received by the laboratory on 10/21/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of the original report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

---	--	--

Case Narrative:

The recovery for mercury in the MS/MSD samples for batch B1J2615 was outside of the laboratory control limits due to the sample concentration being disproportionate to the spike amount. The LCS/LCSD samples, and %RPDs were within limits. The MS/MSD source sample was U-LWBC7-1.

An LCS/LCSD was prepared and analyzed for 8082 water batch B1J2114 instead of the method specified LCS/MS/MSD. Insufficient sample was received to meet method QC requirements.

The recoveries of the 8082 surrogate decachlorobiphenyl, surrogate tetrachloro-meta-xylene, and Aroclor 1260 in the batch B1J2406 MSD and the corresponding %RPD were outside laboratory acceptance limits. Recoveries of the surrogates and spike were within limits in the LCS/MS. The source sample was not associated with this work order.

The recovery of the 8082 surrogate dechlorobiphenyl for sample U-LWBC7-1 was above laboratory acceptance limits due to sample matrix interference.

The recoveries for alpha-BHC, gamma-BHC, delta-BHC, and 4,4'-DDD were above the method limits and recoveries for 4,4'-DDT and methoxychlor were below the method limits in the ending 8081A continuing calibration verification standard (CCVS). However, following calibration evaluation procedures per EPA 8000B, the average % difference for all analytes was within the method limit, verifying the calibration. The specific analytes are flagged as required. All recoveries were within limits in the beginning and middle CCVS.

The recoveries of the 8081A surrogate dechlorobiphenyl for samples U-LWBC7-1, U-LWBC7-3, and U-LWBC5-1 were above laboratory acceptance limits due to sample matrix interference.

The recovery of the 8081A spike compound 4,4'-DDT in the MS/MSD samples for batch B1J2604 was above laboratory acceptance limits. All spike compounds were within limits in the LCS. The source sample was not associated with this work order.

An LCS/LCSD/MS was prepared and analyzed for 8270 water batch B1J2409 instead of the method specified LCS/MS/MSD. Insufficient sample was received to meet method QC requirements

The recovery for the 8270 water compound fluorene in the LCS/LCSD samples for batch B1J2409 was above laboratory limits. All spike compounds were within limits in the batch MS.

The recovery for the 8270 surrogate 2-fluorobiphenyl in sample U-LWBC7_1 was below laboratory limits.

The recovery for ethylbenzene in the MS/MSD samples for batch B1J2441 was above 8260 laboratory limits, but within limits in the LCS. The MS/MSD source sample was not associated with this work order

Acetone and tetrahydrofuran were detected between the MDL and RL in the 8260 batch B1J2441 BLK. Samples with acetone and tetrahydrofuran detections less than or equal to 10 times the blank contamination are qualified.

This report was revised on November 3, 2011 to make changes to the case narrative. This report supercedes the report dated November 2, 2011.

Notes and Definitions

- QM-10 LCS/LCSD were analyzed in place of MS/MSD.
- B-02 Target analyte was present in the method blank between the MDL and RL.
- J Parameter was present between the MDL and RL and should be considered an estimated value
- L1a The associated blank spike recovery was above laboratory acceptance limits.
- M1 Matrix spike recovery was high, the associated blank spike recovery was acceptable.
- M2 Matrix spike recovery was low, the associated blank spike recovery was acceptable.
- M3 The spike recovery value is unusable since the analyte concentration in the sample is disproportionate to the spike level. The associated blank spike recovery was acceptable.
- B-01 Analyte was present in the method blank. Sample result is less than or equal to 10 times the blank concentration.
- QM-05 The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data is acceptable.
- W-03 The initial sample weight was less than 8.0 grams.
- QR-04 The RPD value for the MS/MSD was outside of QC acceptance limits. Data was accepted based on LCS and/or LCSD recovery and/or RPD values.
- S-02 Surrogate recovery outside of laboratory acceptance limits.
- S-04 The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.
- S-GC Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate(s).
- T-1 MDH does not offer certification for this parameter.
- V7 Calibration verification recovery was above the method control limit for this analyte, however the average % difference or % drift for all the analytes met method criteria.
- V8 Calibration verification recovery was below the method control limit for this analyte, however the average % difference or % drift for all the analytes met method criteria.
- Q9 Insufficient sample received to meet method QC requirements.
- < Less than value listed
- dry Sample results reported on a dry weight basis
- NA Not applicable. The %RPD is not calculated from values less than the reporting limit.
- MDL Method Detection Limit
- RL Reporting Limit
- RPD Relative Percent Difference
- LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
- MS Matrix Spike = Laboratory Fortified Matrix (LFM)

To: Bach Pham (bpham@legend-group.com)
Subject: UMore PCB and Pest Surrogate failures

Bach,

To better tell UMore's story, I'd like to get pictures of the PCB and OC pesticide chromatograms for the surrogate failures on the method blanks, LCS, samples etc. Can you please have Van give me a shot of a "good" surrogate chrome, a picture of a bad surrogate recovery on a selected samples below.

U-LWBC5-1_10202011
U-LWBC7-1_10202011
U-LWBC7-1_10202011
B1J2406-MSD1_10242011_MSD
B1J2406-MSD1_10242011_MSD

We had some sample surrogate recoveries that were 400+% to 1090%. I just want to show pictures of them to support the matrix interferences discussed in the case narratives of the reports. Please don't overlay the chromatograms because it is too hard to read in black and white.

I ran a query of the data base (Attached) that shows all samples whose surrogates were either below or above the laboratory acceptance window for surrogate %Rs.

Work Order Number: 1105132
RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 10/21/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

Shipping Container Information

Default Cooler Temperature (°C): 3.8

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: No

Case Narrative:

The recovery for mercury in the MS/MSD samples for batch B1J2615 was outside of the laboratory control limits due to the sample concentration being disproportionate to the spike amount. The LCS/LCSD samples, and %RPDs were within limits. The MS/MSD source sample was not associated to this work order.

Recoveries for alpha-BHC, gamma-BHC, delta-BHC, and 4,4'-DDD were above the method limits and recoveries for 4,4'-DDT and methoxychlor were below the method limits in the ending 8081A continuing calibration verification standard (CCVS). However, following calibration evaluation procedures per EPA 8000B, the average % difference for all analytes was within the method limit, verifying the calibration. The specific analytes are flagged as required. All recoveries were within limits in the beginning and middle CCVS.

Recoveries of the 8081A spike compound 4,4'-DDT were above laboratory acceptance limits in the batch B1J2604 MS/MSD. All spike compounds were within limits in the LCS. The source sample was sample U-PC6-1.

Recovery for the 8270 surrogates 2-fluorobiphenyl in sample U-PC6_1 was below laboratory limits.

Recoveries for ethylbenzene in the batch B1J2441 MS/MSD were above 8260 laboratory limits but within limits in the LCS. The MS/MSD source sample was not associated with this work order

Acetone and tetrahydrofuran were detected in the 8260 batch B1J2441 BLK between the MDL and RL. Samples with acetone and tetrahydrofuran detections less than or equal to 10 times the blank contamination are qualified.

Notes and Definitions

V8	Calibration verification recovery was below the method control limit for this analyte, however the average % difference or % drift for all the analytes met method criteria.
V7	Calibration verification recovery was above the method control limit for this analyte, however the average % difference or % drift for all the analytes met method criteria.
T-1	MDH does not offer certification for this parameter.
S-GC	Surrogate recovery outside of control limits. The data was accepted based on valid recovery of the remaining surrogate(s).
QM-05	The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data is acceptable.
M3	The spike recovery value is unusable since the analyte concentration in the sample is disproportionate to the spike level. The associated blank spike recovery was acceptable.
M1	Matrix spike recovery was high, the associated blank spike recovery was acceptable.
J	Parameter was present between the MDL and RL and should be considered an estimated value
B-02	Target analyte was present in the method blank between the MDL and RL.
B-01	Analyte was present in the method blank. Sample result is less than or equal to 10 times the blank concentration.
<	Less than value listed
dry	Sample results reported on a dry weight basis
NA	Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL	Method Detection Limit
RL	Reporting Limit
RPD	Relative Percent Difference
LCS	Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS	Matrix Spike = Laboratory Fortified Matrix (LFM)

Shipping Container Information

Default Cooler Temperature (°C):

Received on ice: Yes Temperature blank was not present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: Yes

Case Narrative:

The recovery for mercury in the MS/MSD samples for batch B1J2615 was outside of the laboratory control limits due to the sample concentration being disproportionate to the spike amount. The LCS/LCSD samples, and %RPDs were within limits. The MS/MSD source sample was not associated to this work order.

Notes and Definitions

- T-1 MDH does not offer certification for this parameter.
- M3 The spike recovery value is unusable since the analyte concentration in the sample is disproportionate to the spike level. The associated blank spike recovery was acceptable.
- J Parameter was present between the MDL and RL and should be considered an estimated value
- < Less than value listed
- dry Sample results reported on a dry weight basis
- NA Not applicable. The %RPD is not calculated from values less than the reporting limit.
- MDL Method Detection Limit
- RL Reporting Limit
- RPD Relative Percent Difference
- LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
- MS Matrix Spike = Laboratory Fortified Matrix (LFM)

REVISION

Ms. Andrea Nord
Barr Engineering Co.
4700 W 77th St
Minneapolis, MN 55435

Work Order Number: 1105173
RE: 23191092

This is a revised report. The details of the revision are listed in the case narrative on the following page.

Enclosed are the results of analyses for samples received by the laboratory on 10/25/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of the original report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

 Ambient: No

Received on ice pack: No
 Acceptable (IH/ISO only): No

Case Narrative:

Recovery for the 8270 surrogate 2,4,6-tribromophenol was below laboratory limits in sample GC-TT4_2-2 due to matrix interference.

Methylene chloride and tetrahydrofuran were detected between the MDL and RL in the 8260 batch B1J2719 BLK. Samples with methylene chloride and tetrahydrofuran detections less than or equal to 10 times the blank contamination are qualified.

This report was revised on November 7, 2011 to change the sample ID of 1105173-05 from E160D-T2A_3-3 to E160-TT2A_3-3. This report supercedes the report dated November 2, 2011.

Notes and Definitions

- W-03 The initial sample weight was less than 8.0 grams.
- T-1 MDH does not offer certification for this parameter.
- S-04 The surrogate recovery for this sample is outside of established control limits due to a sample matrix effect.
- J Parameter was present between the MDL and RL and should be considered an estimated value
- B-02 Target analyte was present in the method blank between the MDL and RL.
- B-01 Analyte was present in the method blank. Sample result is less than or equal to 10 times the blank concentration.
- < Less than value listed
- dry Sample results reported on a dry weight basis
- NA Not applicable. The %RPD is not calculated from values less than the reporting limit.
- MDL Method Detection Limit
- RL Reporting Limit
- RPD Relative Percent Difference
- LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
- MS Matrix Spike = Laboratory Fortified Matrix (LFM)

ANALYTICAL REPORT FOR SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
U-SanC5-TT1_10-10	1105174-01	Soil	10/21/11 16:00	10/25/11 10:45

Shipping Container Information

Default Cooler	Temperature (°C):	
Received on ice: Yes	Temperature blank was not present	Received on ice pack: No
Received on melt water: No	Ambient: No	Acceptable (IH/ISO only): No
Custody seals: Yes		

Case Narrative:

The recoveries for alpha-BHC, gamma-BHC, delta-BHC, and 4,4'-DDD were above the method limits and recoveries for 4,4'-DDT and methoxychlor were below the method limits in the ending 8081A continuing calibration verification standard (CCVS). However, following calibration evaluation procedures per EPA 8000B, the average % difference for all analytes was within the method limit, verifying the calibration. The specific analytes are flagged as required. All recoveries were within limits in the beginning and middle CCVS.

The recovery of the 8081A spike compound 4,4'-DDT was above laboratory acceptance limits for MS/MSD samples in batch B1J2604. All spike compounds were within limits in the LCS. The source sample was not associated with this work order.

Methylene chloride and tetrahydrofuran were detected between the MDL and RL in the 8260 batch B1J2719 BLK. Samples with methylene chloride and tetrahydrofuran detections less than or equal to 10 times the blank contamination are qualified.

Notes and Definitions

V8	Calibration verification recovery was below the method control limit for this analyte, however the average % difference or % drift for all the analytes met method criteria.
V7	Calibration verification recovery was above the method control limit for this analyte, however the average % difference or % drift for all the analytes met method criteria.
T-1	MDH does not offer certification for this parameter.
QM-05	The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data is acceptable.
J	Parameter was present between the MDL and RL and should be considered an estimated value
B-02	Target analyte was present in the method blank between the MDL and RL.
B-01	Analyte was present in the method blank. Sample result is less than or equal to 10 times the blank concentration.
<	Less than value listed
dry	Sample results reported on a dry weight basis
NA	Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL	Method Detection Limit
RL	Reporting Limit
RPD	Relative Percent Difference
LCS	Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS	Matrix Spike = Laboratory Fortified Matrix (LFM)

RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 10/25/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

Notes and Definitions

T-1	MDH does not offer certification for this parameter.
J	Parameter was present between the MDL and RL and should be considered an estimated value
<	Less than value listed
dry	Sample results reported on a dry weight basis
NA	Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL	Method Detection Limit
RL	Reporting Limit
RPD	Relative Percent Difference
LCS	Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS	Matrix Spike = Laboratory Fortified Matrix (LFM)

Minneapolis, MN 55435

Work Order Number: 1105285
RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 10/31/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

Shipping Container Information

Default Cooler Temperature (°C): 1.3

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: Yes

Case Narrative:

The recovery for lead in the MS/MSD sample for batch B1K0301 was outside of the laboratory control limits due to the analyte concentration being disproportionate to the spike level. The LCS/LCSD samples and %RPDs were within limits. The MS/MSD source sample was 303A-TT3_0.5-0.5.

Notes and Definitions

- T-2 MPCA does not require certification for this parameter.
- T-1 MDH does not offer certification for this parameter.
- QM-05 The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data is acceptable.
- M3 The spike recovery value is unusable since the analyte concentration in the sample is disproportionate to the spike level. The associated blank spike recovery was acceptable.
- < Less than value listed
- dry Sample results reported on a dry weight basis
- NA Not applicable. The %RPD is not calculated from values less than the reporting limit.
- MDL Method Detection Limit
- RL Reporting Limit
- RPD Relative Percent Difference
- LCS Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
- MS Matrix Spike = Laboratory Fortified Matrix (LFM)

Ms. Andrea Nord
Barr Engineering Co.
4700 W 77th St
Minneapolis, MN 55435

Work Order Number: 1105287
RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 10/31/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

Default Cooler Temperature (°C): 1.3

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: Yes

Case Narrative:

The recovery for lead in the MS/MSD sample for batch B1K0301 was outside of the laboratory control limits due to the analyte concentration being disproportionate to the spike level. The LCS/LCSD samples and %RPDs were within limits. The MS/MSD source sample was not associated with this work order.

Notes and Definitions

T-1	MDH does not offer certification for this parameter.
M3	The spike recovery value is unusable since the analyte concentration in the sample is disproportionate to the spike level. The associated blank spike recovery was acceptable.
<	Less than value listed
dry	Sample results reported on a dry weight basis
NA	Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL	Method Detection Limit
RL	Reporting Limit
RPD	Relative Percent Difference
LCS	Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS	Matrix Spike = Laboratory Fortified Matrix (LFM)

REVISION

Ms. Andrea Nord
Barr Engineering Co.
4700 W 77th St
Minneapolis, MN 55435

Work Order Number: 1105289
RE: 23191092

This is a revised report. The details of the revision are listed in the case narrative on the following page.

Enclosed are the results of analyses for samples received by the laboratory on 10/31/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: Yes

Case Narrative:

An LCS/LCSD/MS was prepared and analyzed for 8270 water batch B1K0221 instead of the method specified LCS/MS/MSD. Insufficient sample was received to meet method QC requirements

The recoveries for the 8270 compounds 2,4-dinitrotoluene, phenanthrene, fluoranthene and the %RPD for 2,4-dinitrotoluene in the MS/MSD samples for batch B1K0209 were outside laboratory limits due to sample matrix interference. All spike compounds were within limits in the batch LCS. The MS/MSD source sample was 208E-SS1_0-0.5.

The recovery for the 8270 compound fluoranthene in the LCS sample for water batch B1K0221 was below laboratory limits. All spike compounds were within limits in the batch LCSD/MS.

The recoveries for the 8270 TCLP compounds hexachlorobenzene and 2,4-dinitrotoluene in the MSD and the %RPD for 2,4-dinitrotoluene in the MS/MSD for batch B1K0807 were above laboratory limits. All spike compounds were within limits in the batch LCS/MS. The MS/MSD source sample was 208E-SS1_0-0.5.

This report was revised on November 22, 2011 to add additional information for the case narrative. Due to noted non-homogeneity of the QC sample matrix, the 8270 compound 2,4-dinitrotoluene in the MS/MSD samples for batch B1K0209 did not provide reliable results for accuracy and precision. Sample results for the QC batch were accepted based on LCS/LCSD percent recoveries and RPD values. This report supercedes the report dated November 10, 2011.

Notes and Definitions

T-1	MDH does not offer certification for this parameter.
QR-04	The RPD value for the MS/MSD was outside of QC acceptance limits. Data was accepted based on LCS and/or LCSD recovery and/or RPD values.
QR-03	The RPD value for the sample duplicate or MS/MSD was outside of QC acceptance limits due to matrix interference. QC batch accepted based on LCS and/or LCSD recovery and/or RPD values.
QM-10	LCS/LCSD were analyzed in place of MS/MSD.
QM-05	The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data is acceptable.
Q9	Insufficient sample received to meet method QC requirements.
M1	Matrix spike recovery was high, the associated blank spike recovery was acceptable.
L2	The associated blank spike recovery was below laboratory acceptance limits.
J	Parameter was present between the MDL and RL and should be considered an estimated value
<	Less than value listed
dry	Sample results reported on a dry weight basis
NA	Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL	Method Detection Limit
RL	Reporting Limit
RPD	Relative Percent Difference
LCS	Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS	Matrix Spike = Laboratory Fortified Matrix (LFM)

REVISION

Ms. Andrea Nord
Barr Engineering Co.
4700 W 77th St
Minneapolis, MN 55435

Work Order Number: 1105290
RE: 23191092

This is a revised report. The details of the revision are listed in the case narrative on the following page.

Enclosed are the results of analyses for samples received by the laboratory on 10/31/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

Default Cooler Temperature (°C): 6.4

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: Yes

Case Narrative:

The recoveries for the 8270 compounds 2,4-dinitrotoluene, phenanthrene, fluoranthene and the %RPD for 2,4-dinitrotoluene in the MS/MSD samples for batch B1K0209 were outside laboratory limits due to sample matrix interference. All spike compounds were within limits in the batch LCS. The MS/MSD source sample was not associated with this work order.

Sample BS-SS2_0.5-0.5 required dilution for the 8270 analysis due to sample matrix interference.

This report was revised on November 15, 2011 to correct sample IDs starting with BS by changing the BS to B5. The sample that required dilution in the case narrative above should be B5-SS2_0.5-0.5. This report supercedes the report dated November 9, 2011.

This report was revised on November 21, 2011 to add additional information for the case narrative. Due to noted non-homogeneity of the QC sample matrix, the 8270 compound 2,4-dinitrotoluene in the MS/MSD samples for batch B1K0209 did not provide reliable results for accuracy and precision. Sample results for the QC batch were accepted based on LCS/LCSD percent recoveries and RPD values. This report supercedes the report dated November 15, 2011.

Notes and Definitions

T-1	MDH does not offer certification for this parameter.
QR-03	The RPD value for the sample duplicate or MS/MSD was outside of QC acceptance limits due to matrix interference. QC batch accepted based on LCS and/or LCSD recovery and/or RPD values.
QM-05	The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data is acceptable.
J	Parameter was present between the MDL and RL and should be considered an estimated value
D1	Sample required dilution due to matrix.
<	Less than value listed
dry	Sample results reported on a dry weight basis
NA	Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL	Method Detection Limit
RL	Reporting Limit
RPD	Relative Percent Difference
LCS	Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS	Matrix Spike = Laboratory Fortified Matrix (LFM)

Shipping Container Information

Default Cooler Temperature (°C): 6.4

Received on ice: Yes Temperature blank was present Received on ice pack: No
 Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
 Custody seals: Yes

Case Narrative:

The recoveries for the 8270 compounds 2,4-dinitrotoluene, phenanthrene, fluoranthene and the %RPD for 2,4-dinitrotoluene in the MS/MSD samples for batch B1K0209 were outside laboratory limits due to sample matrix interference. All spike compounds were within limits in the batch LCS. The MS/MSD source sample was not associated with this work order.

Notes and Definitions

T-1 MDH does not offer certification for this parameter.

QR-03 The RPD value for the sample duplicate or MS/MSD was outside of QC acceptance limits due to matrix interference. QC batch accepted based on LCS and/or LCSD recovery and/or RPD values.

QM-05 The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data is acceptable.

< Less than value listed

dry Sample results reported on a dry weight basis

NA Not applicable. The %RPD is not calculated from values less than the reporting limit.

Shipping Container Information

Default Cooler Temperature (°C): 6.4

Received on ice: Yes Temperature blank was present Received on ice pack: No
Received on melt water: No Ambient: No Acceptable (IH/ISO only): No
Custody seals: Yes

Case Narrative:

The recoveries for the 8270 compounds 2,4-dinitrotoluene, phenanthrene, fluoranthene and the %RPD for 2,4-dinitrotoluene in the MS/MSD samples for batch B1K0209 were outside laboratory limits due to sample matrix interference. All spike compounds were within limits in the batch LCS. The MS/MSD source sample was not associated with this work order.

---	--	--

Notes and Definitions

T-1	MDH does not offer certification for this parameter.
QR-03	The RPD value for the sample duplicate or MS/MSD was outside of QC acceptance limits due to matrix interference. QC batch accepted based on LCS and/or LCSD recovery and/or RPD values.
QM-05	The spike recovery was outside acceptance limits for the MS and/or MSD due to matrix interference. The LCS and/or LCSD were within acceptance limits showing that the laboratory is in control and the data is acceptable.
J	Parameter was present between the MDL and RL and should be considered an estimated value
<	Less than value listed
dry	Sample results reported on a dry weight basis
NA	Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL	Method Detection Limit
RL	Reporting Limit
RPD	Relative Percent Difference
LCS	Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS	Matrix Spike = Laboratory Fortified Matrix (LFM)

REVISION

Ms. Andrea Nord
Barr Engineering Co.
4700 W 77th St
Minneapolis, MN 55435

Work Order Number: 1105380
RE: 23191092

This is a revised report. The details of the revision are listed in the case narrative on the following page.

Enclosed are the results of analyses for samples received by the laboratory on 10/21/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of the original report and then discarded unless other arrangements are made.

MDH Certification #027-123-295

ANALYTICAL REPORT FOR SAMPLES

Sample ID	Laboratory ID	Matrix	Date Sampled	Date Received
U-LWBC5-1	1105380-01	Soil	10/20/11 15:00	10/21/11 12:00

Shipping Container Information

Default Cooler Temperature (°C): 2.4

Received on ice: Yes	Temperature blank was present	Received on ice pack: No
Received on melt water: No	Ambient: No	Acceptable (IH/ISO only): No
Custody seals: Yes		

Case Narrative:

The recoveries for the 8270 TCLP compounds hexachlorobenzene and 2,4-dinitrotoluene in the MSD and the %RPD for 2,4-dinitrotoluene in the MS/MSD for batch B1K0807 were above laboratory limits. All spike compounds were within limits in the batch LCS/MS. The MS/MSD source sample was not associated with this work order.

This report was revised on November 17, 2011 to add an H4 qualifier to the sample. This report supercedes the report dated November 9, 2011.

Notes and Definitions

QR-04	The RPD value for the MS/MSD was outside of QC acceptance limits. Data was accepted based on LCS and/or LCSD recovery and/or RPD values.
M1	Matrix spike recovery was high, the associated blank spike recovery was acceptable.
H4	Sample was extracted past required extraction holding time, but analyzed within analysis holding time.
<	Less than value listed
dry	Sample results reported on a dry weight basis
NA	Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL	Method Detection Limit
RL	Reporting Limit
RPD	Relative Percent Difference
LCS	Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS	Matrix Spike = Laboratory Fortified Matrix (LFM)

Notes and Definitions

T-2	MPCA does not require certification for this parameter.
T2	Cited ADHS licensed method does not contain this analyte as part of method compound list.
T-1	MDH does not offer certification for this parameter.
QM-10	LCS/LCSD were analyzed in place of MS/MSD.
Q9	Insufficient sample received to meet method QC requirements.
J	Parameter was present between the MDL and RL and should be considered an estimated value
H3b	The trip-blank sample was received and analyzed past holding time.
<	Less than value listed
dry	Sample results reported on a dry weight basis
NA	Not applicable. The %RPD is not calculated from values less than the reporting limit.
MDL	Method Detection Limit
RL	Reporting Limit
RPD	Relative Percent Difference
LCS	Laboratory Control Spike = Blank Spike (BS) = Laboratory Fortified Blank (LFB)
MS	Matrix Spike = Laboratory Fortified Matrix (LFM)

Work Order Number: 1106017
RE: 23191092

Enclosed are the results of analyses for samples received by the laboratory on 12/21/11. If you have any questions concerning this report, please feel free to contact me.

All samples will be retained by LEGEND, unless consumed in the analysis, for 30 days from the date of this report and then discarded unless other arrangements are made.

Case Narrative

TestAmerica West Sacramento Project Number G1G150429

SOLID, TAL-SOP WS-WC-0050, Nitrocellulose

Sample: 1

This sample was reported on a wet weight or “as received” basis due to the level of nitrocellulose detected.

There are no other anomalies associated with this project.

Qualifiers

General Chemistry

Qualifier	Qualifier Description
N	Spike sample recovery is outside control limits.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
☼	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CNF	Contains no Free Liquid
DL, RA, RE, IN	Indicates a Dilution, Reanalysis, Re-extraction, or additional Initial metals/anion analysis of the sample
EDL	Estimated Detection Limit
EPA	United States Environmental Protection Agency
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
RL	Reporting Limit
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)
